

**These products are ETL-listed for the North American market.**

**BUTLER 732** offers electric height adjustment up to 112 cm, letting you both see and reach everything.

The model features curved arms and is mounted further forward in the cabinet, which brings the clothes rail further out than on BUTLER 730, and you can stop the rail at any height.

An average-height person can comfortably reach around 190 cm, which means the rail can be positioned up to 300 cm above the floor in its upper position.

This frees up space below for an additional rail or other storage, the obvious solution for modern dressing rooms, walk-in closets, and retail fittings.

## Functions and advantages

- Load bearing capacity 30 kg
- Telescopic for interior wardrobe dimensions from 545 to 1568 mm in width
- Stylish and discreet design
- Very quiet motors also take up little space inside the wardrobe
- Integrated safety stop halts movement upon collision
- A Bluetooth control button is included in the delivery. A wireless remote control for operating multiple lifts from the same handset is available as an accessory.

## Standard equipment

- 1x Wardrobe lift
- 1x Control unit with 2 connection cables
- 1x Power supply unit with plug
- 1x Bluetooth control button
