

# BASICLINE 406

Basicline 406 is a bracket with gas spring for height adjustment of the wash basin. The built-in gas spring helps to adjust the height of the washbasin to the desired position. No tools required for adjustment. Basicline 406 is mounted below the mirror and mirror cabinet.

Height adjustment without tools in 1,3 cm intervals, total ca. 19 cm.

Behind the washbasin is a shelf for bathroom articles.
