

# BUTLER 730 / 732

Electric Wardrobe Lifts

Granberg's story is one of solid craftsmanship, care, and functionality working hand in hand for more than 150 years. When Otto Granberg began crafting furniture in Ringarum in 1870, the goal was simple: to create durable products that people could rely on. That ambition lives on to this day.

Over generations, the company has grown and evolved – from traditional joinery to modern industrial manufacturing in Norrköping. Quality, responsibility, and personal service have always been fundamental to the way Granberg works.

In 1960, Granberg began its modern chapter with a focus on products that enhance accessibility. Since then, the company has developed solutions that make everyday life easier and more independent for people with different needs – in private homes as well as in schools, care homes, and hospitals. With Swedish manufacturing, extensive experience, and a clear commitment to sustainability, Granberg is today a world-leading company in products that improve accessibility.

Granberg's products are built on more than 150 years of experience in quality and functionality.

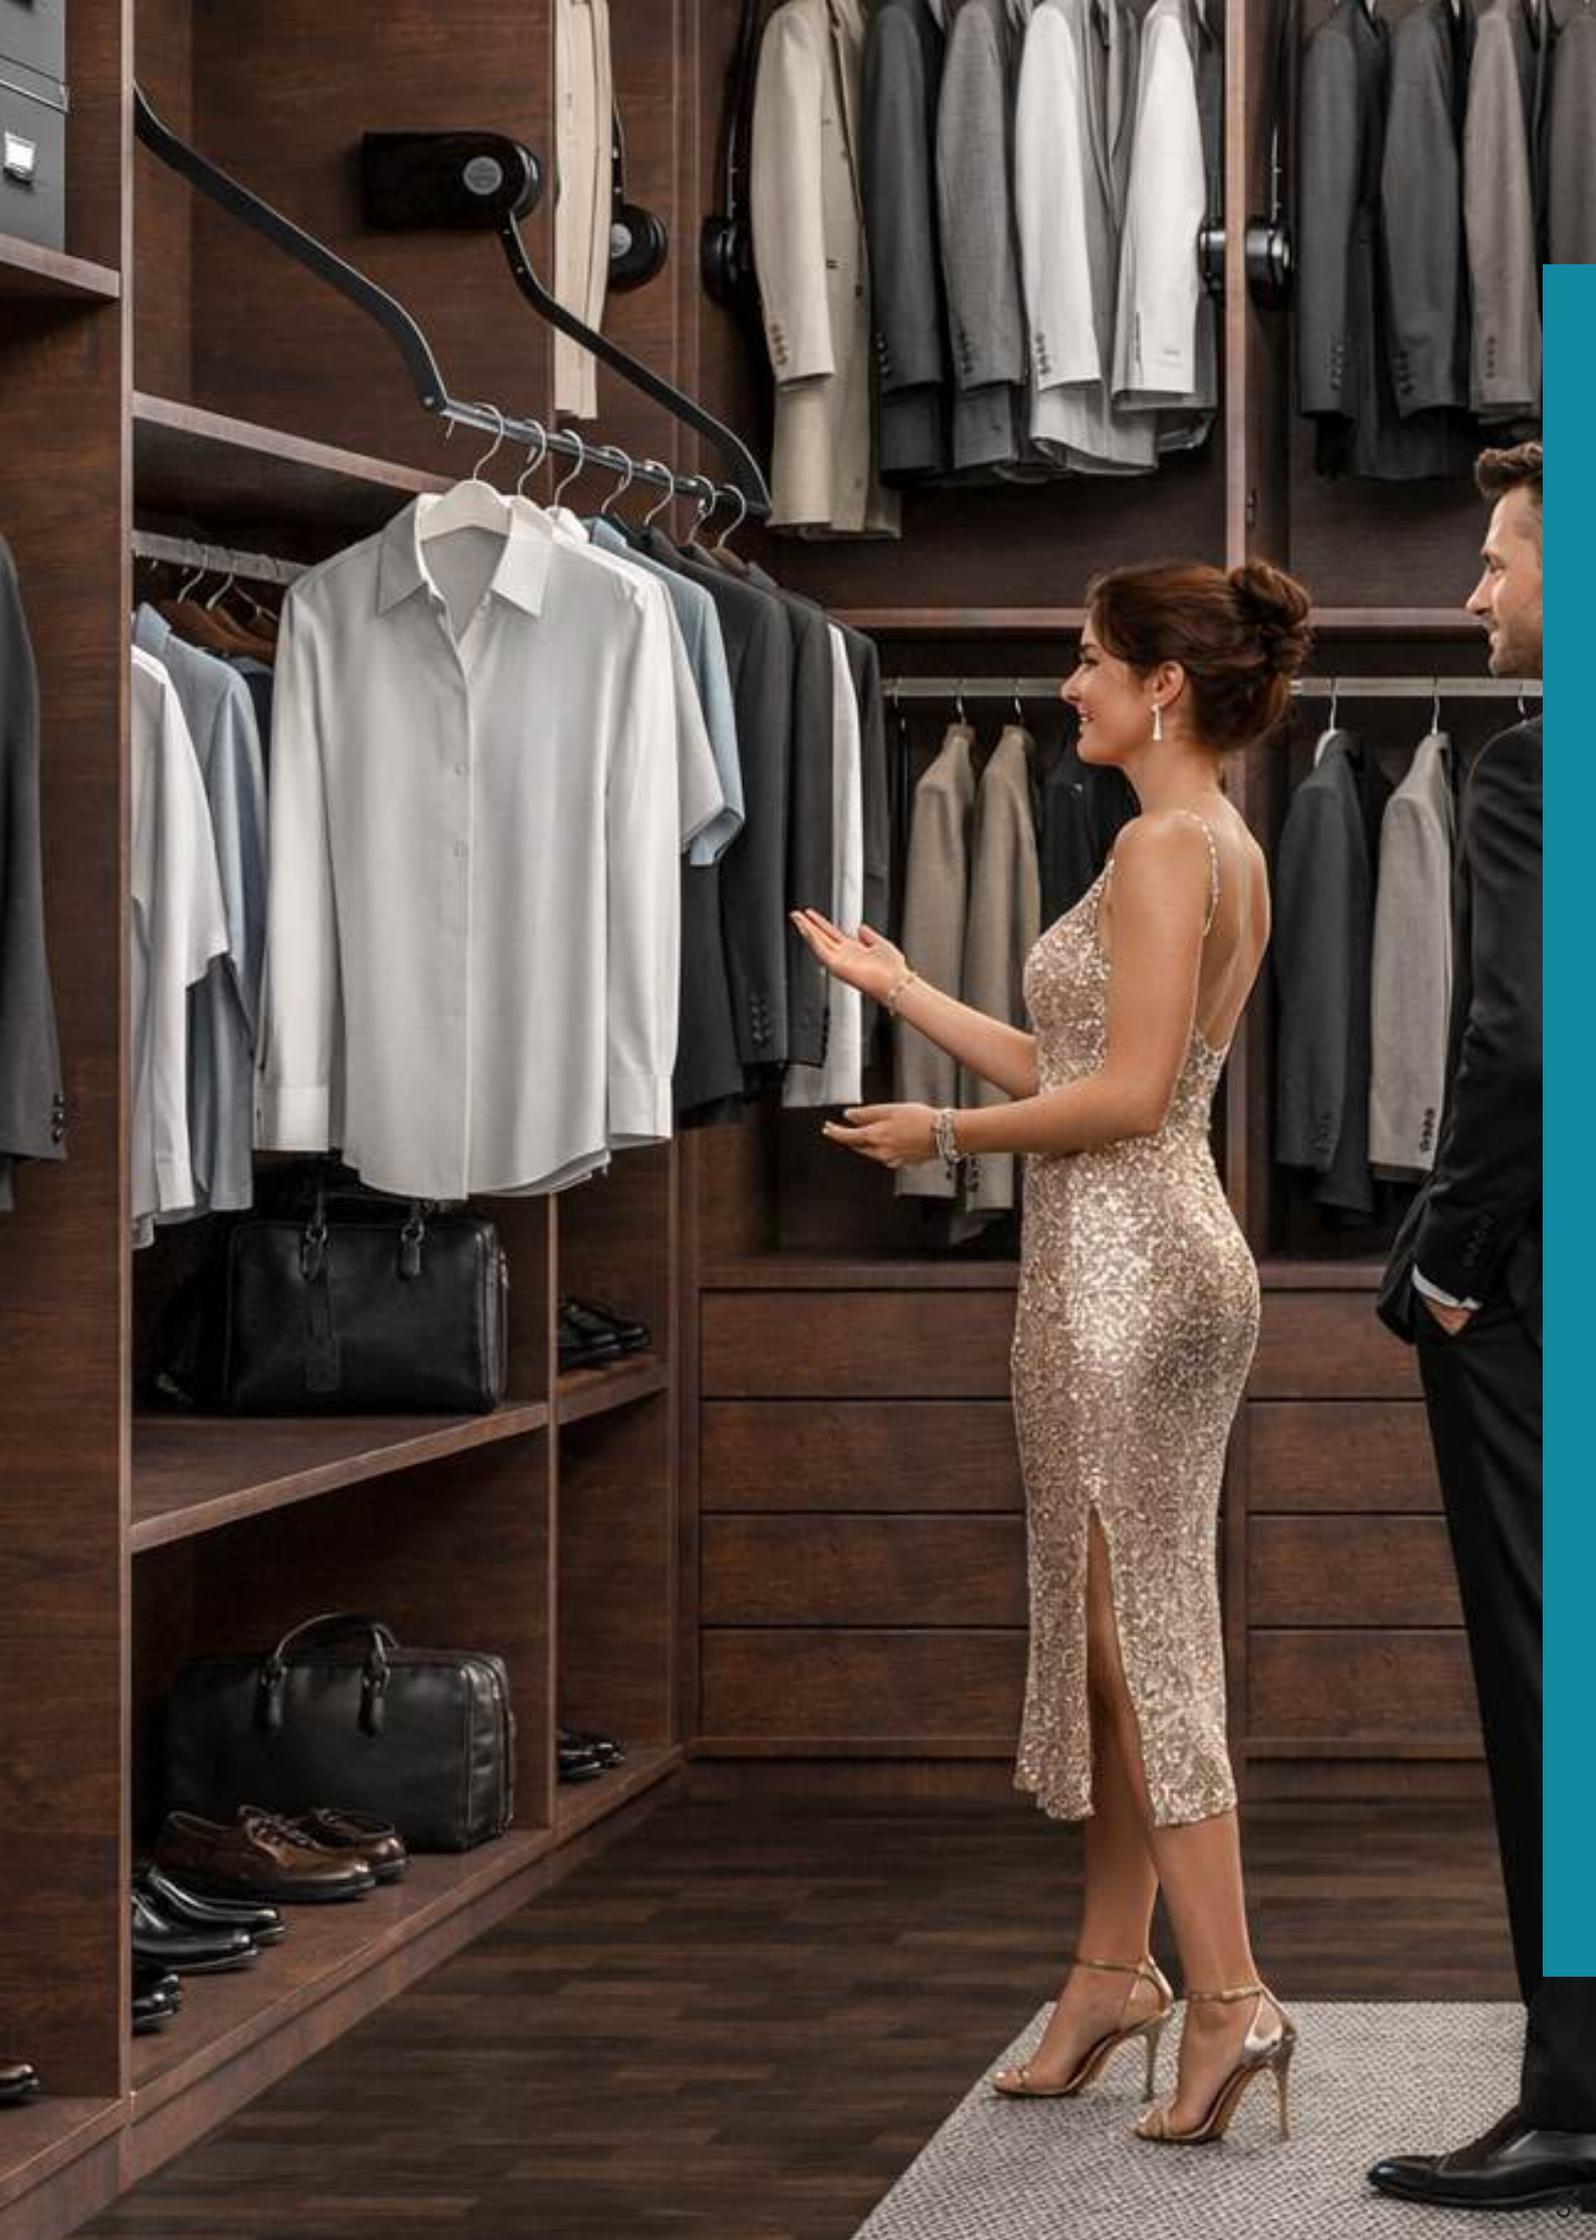

For your peace of mind, we offer a **5-year warranty** on our products.

Safety is a natural and integral part of Granberg's commitment to quality. All our lift systems are CE marked and have undergone comprehensive risk assessments and testing.

Our products are based on proven technology and are equipped with built-in safety systems that immediately stop movement if an obstruction is detected.

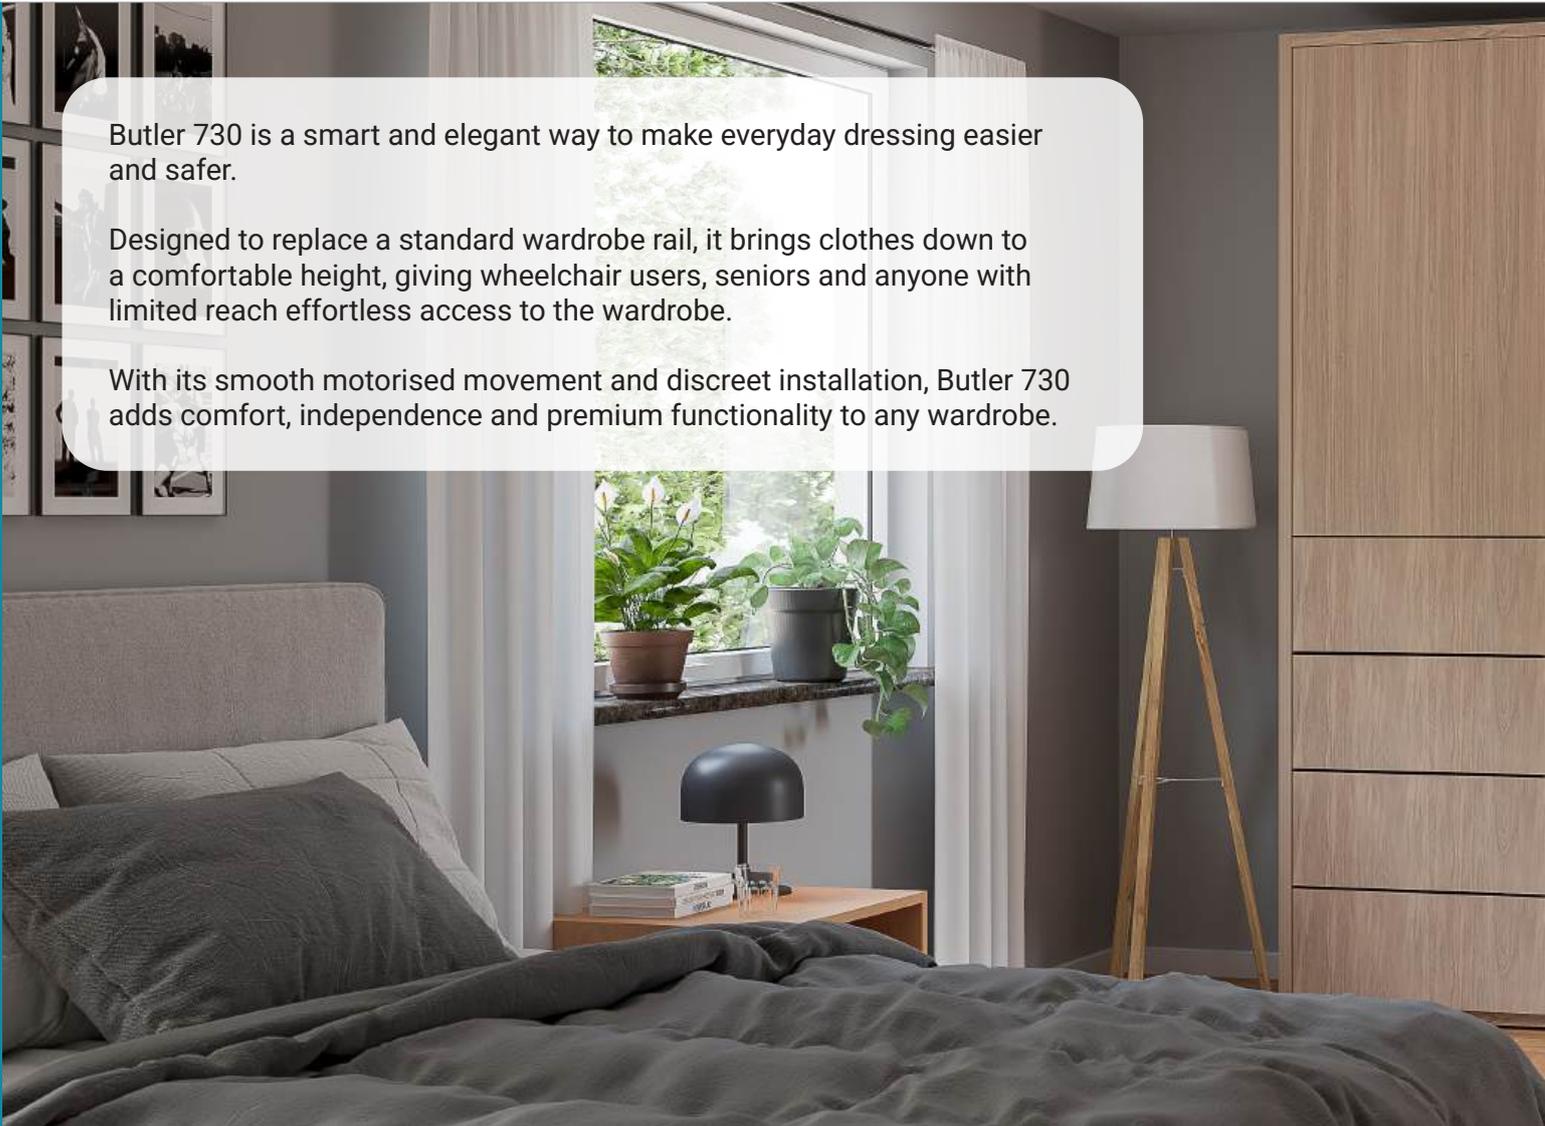

# BUTLER 730

Ideal for wheelchair users and the elderly – enhancing safety and accessibility without effort.

Butler 730 is a smart and elegant way to make everyday dressing easier and safer.

Designed to replace a standard wardrobe rail, it brings clothes down to a comfortable height, giving wheelchair users, seniors and anyone with limited reach effortless access to the wardrobe.

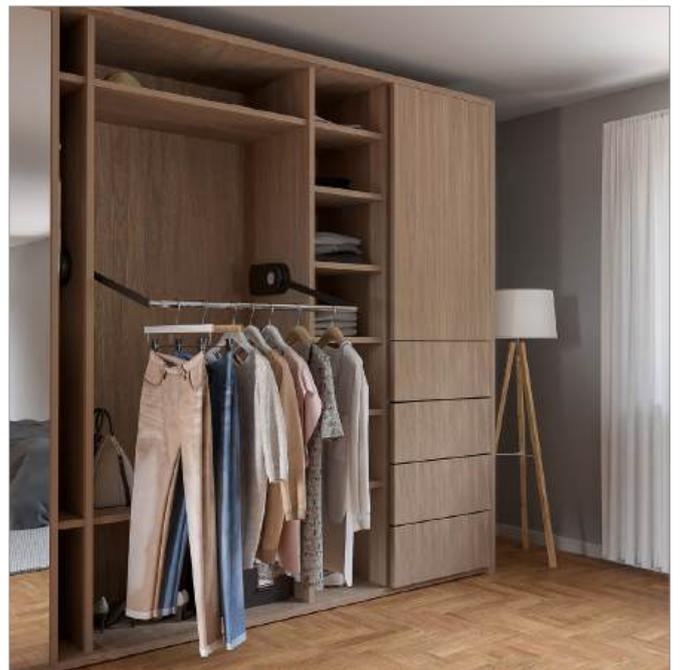

With its smooth motorised movement and discreet installation, Butler 730 adds comfort, independence and premium functionality to any wardrobe.

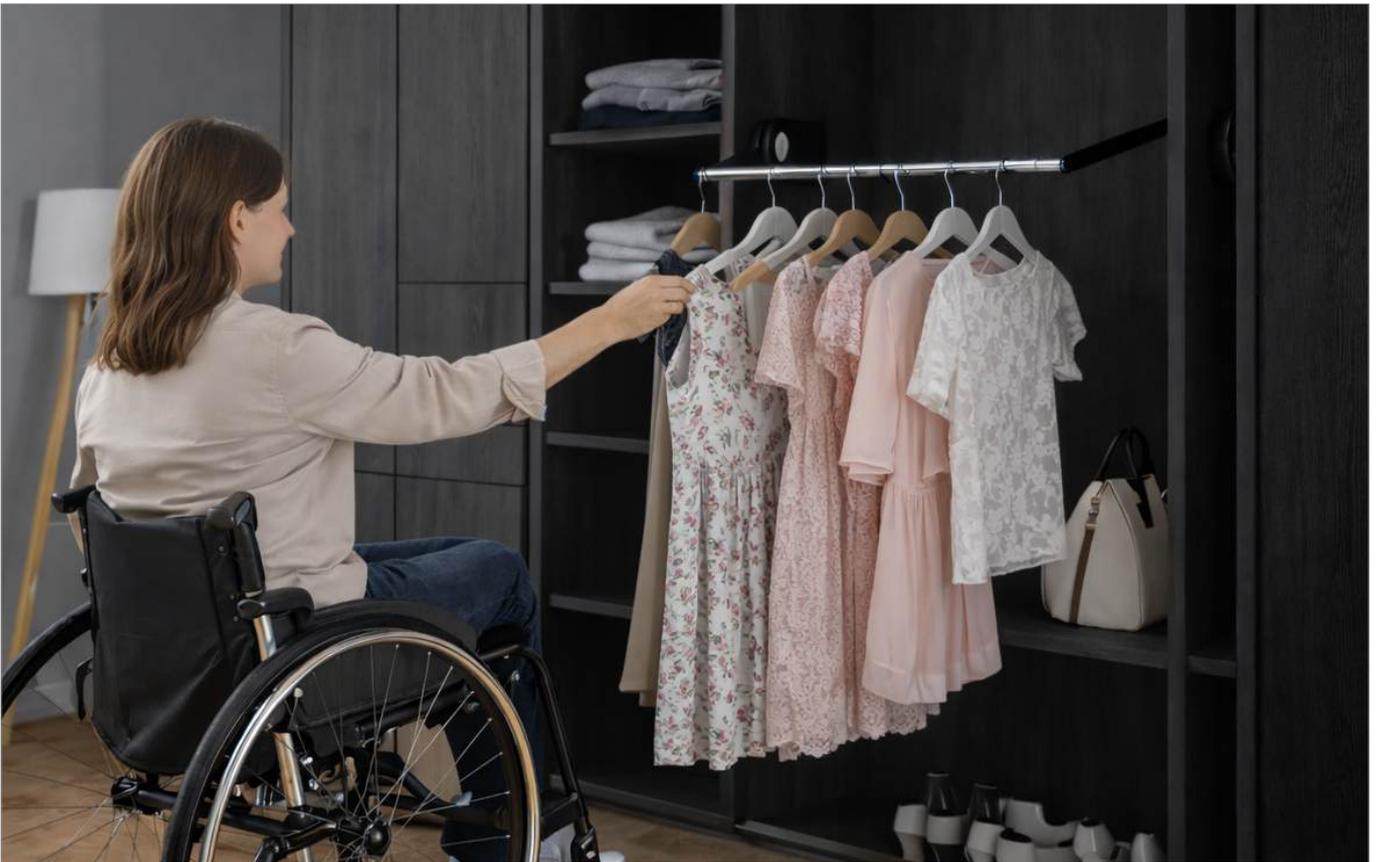

Lowering clothes rail that makes the wardrobe easily accessible for wheelchair users, the elderly, and people with limited reach.

Butler 730 in the raised position.

Butler 730 in the lowered position.
